

ABOUT FIRST LOOK@ARGONNE

The First Look@Argonne Conference is a half-day, immersive experience for students who are part of an Underrepresented Group (URG) within the U.S. and U.S. Territories to learn about Argonne's multidisciplinary science portfolio, robust internship programs, and the scientific staff dedicated to this scientific work and developing the next generation of researchers.

This year's conference will be held virtually and will allow students to:

1. Learn about the Department of Energy (DOE) complex and Argonne's mission science research.
2. Explore Argonne's campus and research facilities virtually.
3. Network with Argonne researchers and engineers across the many different STEM disciplines.
4. Learn about summer and year-round research opportunities for undergraduate students.
5. Connect with current and past interns.
6. Consider participation in a tandem event, *Mini-Semester*, to further prepare you for an internship at a national laboratory.

TARGET AUDIENCE

All are invited to register and attend! Students from freshman to 5th year seniors, as well as university faculty and administrators.

We are especially looking to support students who identify as a:

- Member of an underrepresented racial and/or ethnic group
- Woman
- Person with disabilities
- A member of the LGBTQ+ community

REGISTRATION REQUIREMENTS

- Be enrolled as a full-time student in a community college or four-year higher education institution in a STEM discipline
- Have a cumulative minimum GPA of 3.0
- Be at least 18 years of age
- Be a United States citizen or Legal Permanent Resident
