

Student Web Developer

Department of Crop Sciences

Seeking Undergraduate Student Hourly for Web Development

Duties: Assist the members of the Web and Content Development Team in the College of Agriculture, Consumer, and Environmental Sciences (ACES). Help develop web pages for faculty and staff, including various programs across multiple departments. Javascript, CSS, PHP, and database application development as well as setting up and maintaining content management systems such as WordPress.

Qualifications: Knowledge of HTML, CSS, & WordPress, demonstrated software knowledge, and an ability to interact with individuals of varying computer skills required. Experience with Javascript and PHP helpful. Familiarity with major software packages and programming tools expected. Successful applicant must be able to work independently in a collaborative environment and be willing to learn a variety of computer-related skills.

Availability: Immediate for 10-20 hours/week (flexible). Would like someone who is available to work through the summer into future fall and spring semesters.

Closing date: When the position is filled.

Other: Pay commensurate with ability (\$12.50/hr minimum).
