

INTERNSHIP OPPORTUNITIES

Mussel Program Internships

Propagation and Life History, Survey and Monitoring

The Minnesota Department of Natural Resources is seeking applicants to fill multiple internship positions at the DNR's Center for Aquatic Mollusk Programs in Lake City, MN.

Mussel Propagation

Intern will assist with laboratory propagation of freshwater mussels and studies of their life history. This includes routine maintenance of aquariums and mussel culture systems, microscope work, collection of native mussels in the field, monitoring juvenile mussels in outdoor rearing containers, providing dive safety support, data collection, and data entry.

Job seekers can find and apply on the [careers page](#) of the State of Minnesota website.

Job Title: Mussel Propagation Intern
Job ID: 51248

Job Title: Mussel Survey Intern (4 positions)
Job ID: 51251

Closing Date for both: January 31, 2022

Mussel Survey

Interns will assist in implementing mussel surveys and monitoring in selected rivers and lakes in Minnesota, Wisconsin and Iowa; to provide dive safety support, assist with laboratory propagation, and to assist with data entry resulting from mussel data collection and research as part of the statewide mussel survey, monitoring, and restoration program.
