

2022 NRES Summer Research and Management Internship

Undergraduates in NRES are eligible to apply for this summer internship to gain experience in both research and management of natural resources. Tasks conducted in this position may include forest health research and monitoring, invasive species research and management, monitoring and managing for wildlife (small mammals, lepidoptera, ixodidae, etc.), forest restoration, and assisting with general management tasks. Opportunities will be available for developing a range of skills, including training in safe use of herbicides, chainsaw use, and other equipment such as tractors, UTVs, and sprayers among others. Interns will work with research specialists and field staff to design and implement a research project.

This is a full-time temporary position, with somewhat flexible start and end dates, approximately May 23-August 12, 2022, 40 hours per week at \$15/hour. Successful candidate will be provided field housing on-site. Candidates should send a cover letter and resume to Chris Evans, Extension Forestry and Research Specialist (cwevans@illinois.edu) by May 12th.

Dixon Springs Agricultural Center – Southern Illinois
